Detailed Action

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-53, drawn to a wire feeder and to methods of providing wire, classified

in class 219, subclass 137.7.

II. Claims 54-61, drawn to methods of arc welding wherein pulse power is supplied

to the welding arc, classified in class 219, subclass 130.51.

Inventions II and the apparatus portion of invention I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process of invention II does not require the particular apparatus of

the apparatus claims in invention I.

Inventions II and the method claims of invention I are related as subcombinations of method steps disclosed as usable together in a single combination of method steps. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a method of welding that does not include the specific control limitations of invention II. See MPEP § 806.05(d).

Art Unit: 1725

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Any inquiry concerning this communication should be directed to Clifford C Shaw at telephone number 571-272-1182. The examiner can normally be reached on Monday through Friday of the first week of the pay period and on Tuesday through Friday of the second week of the pay period.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Thomas G. Dunn, can be reached at 571-272-1171. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
